You can browse the past day's free books as well but you must create an account before downloading anything. A free account also gives you access to email alerts in all the genres you choose.

### Evolution Stephen Baxter

Baxter's goal is nothing less than to dramatize the grand sweep of primate development. . . . Evolution is a cautionary tale, warning of the dire consequences to contemporary humans if we persist in behavior that threatens the survival of our ecosystem." —The New York Times Book Review "Baxter's depictions are brilliant,...

### Amazon.com: Evolution (9780345457837): Baxter, Stephen: Books

Evolution is a collection of short stories that work together to form an episodic science fiction novel by author Stephen Baxter. It follows 565 million years of human evolution, from shrewlike mammals 65 million years in the past to the ultimate fate of humanity (and its descendants, both biological and non-biological) 500 million years in the future.

### Evolution (Baxter novel) - Wikipedia

Stephen Baxter is a trained engineer with degrees from Cambridge (mathematics) and Southampton Universities (doctorate in aeroengineering research). Baxter is the winner of the British Science Fiction Award and the Locus Award, as well as being a nominee for an Arthur C. Clarke Award, most recently for *Manifold: Time*.

### Evolution by Stephen Baxter - Goodreads

Baxter makes an impressive job of putting flesh on to the bones of the scientific theory and in its imaginative vision *Evolution* deserves comparison with SF epics such as Olaf Stapledon's *Last and First Men* or Alfred Doblin's *Mountains, Seas, and Giants*. Baxter leaves you with a memorable yet unsettling sense of our insignificance in the scheme of things.

### Evolution by Stephen Baxter: 9780345457837 ...

In *Evolution* Baxter takes the reader on another of his epic explorations of the human condition. Here we follow the primates, from the earliest mouse sized hole dwellers in the age of dinosaurs all the way through the sweep of human genetic history ending with a strange primate/tree symbiosis in the distant future. Baxter points out that this is a work of fiction, not a textbook of human evolution.

### Evolution by Stephen Baxter, Paperback | Barnes & Noble®

Following up his cosmic *Manifold* series, Stephen Baxter peers back on a more prosaic history in the worthy yet uneven *Evolution*. The book is nothing less than a novelization of human evolution, a mega-Michener treatment of 65 million years starring a host of smart, furry primates representing *Homo sapiens*'s ancestry. Each stage of our ancestry is represented by a character of progressively increasing intelligence, empathy, and brain size, who must survive predation and other perils long ...

Stephen Baxter is a trained engineer with degrees from Cambridge (mathematics) and Southampton Universities (doctorate in aeroengineering research). Baxter is the winner of the British Science Fiction Award and the Locus Award, as well as being a nominee for an Arthur C. Clarke Award, most recently for *Manifold: Time*.

### **Evolution - Stephen Baxter - Google Books**

Evolution by Stephen Baxter (2003) Cover blurb Stretching from the distant past into the remote future, from primordial Earth to the stars, Evolution is a soaring symphony of struggle, extinction, and survival; a dazzling epic that combines a dozen scientific disciplines and a cast of unforgettable characters to convey the grand drama of evolution in all its awesome majesty and rigorous beauty.

### **Evolution by Stephen Baxter (2003) - Prehistoric Pulp**

Stephen Baxter's Evolution also charts the course of human history, but where Wells was content with broad brushstrokes, Baxter gives us a Technicolor panorama of human development, beginning 65 million years ago and ending 500 million years in the future.

### **Review: Evolution by Stephen Baxter | Books | The Guardian**

Stephen Baxter at the Science-Fiction-Tage NRW in Dortmund, Germany, March 1997 A second category in Baxter's work is based on readings in evolutionary biology and human/animal behaviour. Elements of this appear in his future histories (especially later works like the Destiny's Children series and Flood/Ark), but here it is the focus.

### **Stephen Baxter (author) - Wikipedia**

Evolution is a novel by Stephen Baxter spanning 645 million years of Earth's history, with most chapters focusing on 65 million years ago to 30 million years in the future. The book is split into three parts: Ancestors, which focuses on various director ancestors to humans, starting with a ratlike animal...
